

MEASURE YOUR SUCCESS

Assignments, long term planning, studying, and more!

Use a Planner

- Use the same planner for all activities
- Write down the due dates for every assignment, test, quiz, or long term assignment immediately
- Be detailed and specific about assignments

Prioritize Assignments

- After writing down daily assignments, identify "Have to Do" versus "Want to Do" tasks
 - "Have to Do" tasks are due the next day
 - "Want to Do" tasks are **not** due the next day
- Order the "Have to Do" tasks by due date and level of importance in your planner

Break Down Long Term Assignments

- List all of the small steps that make up the long term assignment
- Schedule a due-date for completing each of the small steps and write these steps in your planner

Make a Study Plan

- Plan to start studying at least 5 days before a test
- Write down what you will specifically study and for how long
- Identify the various study strategies you will use
